# EUCOPAVE SYSTEM

Semi-Flexible, Hybrid Paving & Flooring Solution

**EUCLID CHEMICAL**

# EUCOPAVE SYSTEM

Semi-Flexible, Hybrid Paving  
& Flooring Solution

## WHAT IS IT?

Have you ever needed:

- ◆ A pavement system more durable than asphalt, yet less expensive than concrete?
- ◆ A pavement solution that is more wear resistant than asphalt, but doesn't require joints and the maintenance that goes with them?
- ◆ A pavement/flooring product that has the key benefits of both asphalt AND concrete?

Then EUCOPAVE is here for you. EucoPave is a semi-flexible, yet durable, hybrid paving and flooring solution fit for numerous industries.

**NO MORE SPALLED JOINTS!** Featuring joint-free construction, EucoPave offers significant advantages over traditional concrete and asphalt in many applications. Starting with a well compacted asphalt base, the system is capped with an open-graded asphalt layer that contains 25-30% void spacing. This layer is then filled with the ultra-high strength EucoPave mortar, which freely flows through the asphalt and forms a wear course that performs like no other. EucoPave is resistant to freeze/thaw environments and traffic damage caused by heavy loads, abrasion, chemical attack and other aggressive service conditions that would otherwise destroy asphalt pavements.

## WHERE WOULD YOU USE THIS PRODUCT?

*EucoPave is a unique pavement solution* for nearly every industry. EucoPave is as tough and durable as any flooring/pavement system on the market, yet it still provides walking comfort for those who need to spend their day on it. EucoPave is ideal for the following applications, but not limited to:

- ◆ Warehouses
- ◆ Commercial & Industrial Flooring
- ◆ Airports
- ◆ Harbors & Terminals

## EUCOPAVE SYSTEM

The Euclid Chemical Company

## HOW DOES EUCOPAVE FIT INTO EUCLID CHEMICAL'S PRODUCT LINE?

*For over 100 years, The Euclid Chemical Company* has provided the world with a full line of products including: admixtures, concrete repair mortars, curing compounds, floor densifiers, cathodic protection, and a long list of other quality solutions. For the first time, we are combining our industry-leading cement expertise with the asphalt paving industry to provide a superior solution to many flooring and pavement problems. EucoPave is unlike any other product in our arsenal. It is the first product we offer that provides a joint-free, nearly maintenance-free flooring/pavement solution, that can be returned to service in 24 hours.

## CAN EUCOPAVE CONTRIBUTE TO THE SUSTAINABILITY OF MY PROJECT?

EucoPave qualifies under LEED category NC SS 7.1- Heat Island Effect: Non-Roof. When installed properly, EucoPave exceeds the solar reflective index requirement for LEED credit. In doing so, this greatly reduces the Heat Island Effect of the overall project.

## WHAT CAN'T THIS PRODUCT DO?

*Not much.* Wherever your needs are for an asphalt or concrete flooring/pavement system, EucoPave can be there, both interior and exterior. For concrete flooring systems requiring high F<sub>i</sub>/F<sub>L</sub> numbers, EucoPave is not the system for you.
