*CEMENT BASED DECORATIVE AND DAMPPROOFING COATING*

## For the Winning Finish...Recommend Euclid Chemical's Concrete Finisher

Do you frequently hear these questions...

- What coating will cover the unsightly mortar joints in concrete block wall?
- Is there a product that will dampproof and stop moisture from penetrating through my concrete wall?

**CONCRETE FINISHER** is now your answer to these challenges.

Decorative and durable, **CONCRETE FINISHER** is a portland cement based coating that is available in three stain resistant compatible colors, Gray, White, and Oyster Gray. Simply mix **CONCRETE FINISHER** powder with an acrylic additive and you have a highly flexible aesthetic coating that features superior adhesion and exceptional crack resistance. Multiple surface textures are available through trowel, float, or spray application methods.

Typical applications include exterior or interior, above grade or below grade surfaces, precast and formed concrete, concrete block, brick, stone, stucco, or cement plaster substrates. The **CONCRETE FINISHER** offers the following advantages:

- Breathable, cement based dampproofing coating
- Excellent adhesion, forms integral bond with substrate
- Trowel or spray applied, fills and levels surface
- Provides uniform surface textures and color
